Clinical Training Program

NEXPLANON® (etonogestrel implant) 68 mg Radiopaque

You are invited to join your colleagues at a Clinical Training Program for NEXPLANON (etonogestrel implant) 68 mg Radiopaque. During the Clinical Training Program for NEXPLANON, you will receive hands-on training for insertion and removal procedures as well as implant localization techniques. Completion of this course will allow you to order the product from authorized distributors. Space is limited to 13 participants; please register early for the session.

This session, which is sponsored by Merck, is not accredited for continuing education credit. The training is open only to Medical Doctors (MDs), Doctors of Osteopathic Medicine (DOs), Nurse Practitioners (NPs), Physicians Assistants (PAs), or Certified Nurse-Midwifes (CNMs), and Residents authorized to perform the procedures entailed in the insertion and removal of NEXPLANON in the jurisdiction where they practice. Additionally, NPs, PAs, and CNMs must attest that they have met all specific state conditions and requirements, including but not limited to signing a collaborative agreement with an MD/DO.

Residents or students in advanced practice training must understand that they can only administer NEXPLANON under the supervision of an attending healthcare provider who has also been trained on the procedures to insert and remove NEXPLANON.

It is Merck’s policy to verify all healthcare provider, US state license and/or NPI number, and eligibility information in advance of the training. Merck will contact you directly if there is a problem. Attendees are expected to attend the entire training, which is approximately 2 to 3 hours in duration. Certificates of attendance will not be issued to those who arrive late or leave early.
