

School-Based Health Centers

The Intersection of Health and Education

Health is a critical factor in setting our children up for success inside and outside of school. School-based health centers (SBHCs) increase access to health care, contribute to positive educational outcomes, reduce emergency room use, lower Medicaid costs, and expand access to mental health services.

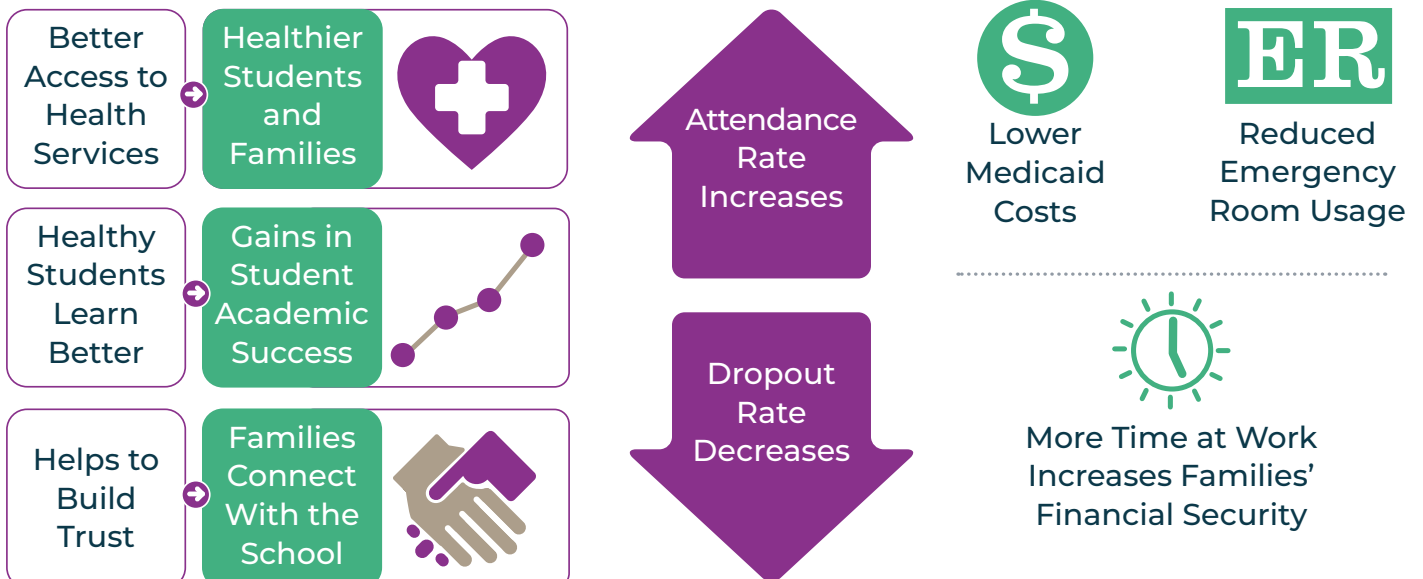

Healthy **Benefits**

Services that SBHCs Provide

Healthy **Impacts**

Health Supports Successful Students & Families

Healthy Partnerships

Delivering Health Services to Underserved Communities

Most school-based health centers are operated by an external medical sponsoring agency.
